Key Word Index

A

Acetylcholinesterase
AF64A; maze learning; basal forebrain; choline acetyltransferase, 119

A10 dopaminergic neuron
nucleus accumbens; dopaminergic graft; 6-hydroxydopamine; lesion; rat, 73

AF64A
maze learning; basal forebrain; choline acetyltransferase; acetylcholinesterase, 119

Aggression
offense; defense; serotonin; ethological analysis; neurotoxin; rat, 85

Amphetamine
visual attention; signal detection; vasopressin; desglycinamide vasopressin; rat, 35

Anterior commissure
corpus callosum; vision; memory; macaque, 267

Apomorphine
caudate nucleus; superior colliculus; motor behaviour; muscimol; haloperidol; switching; cat, 17

Atropine
scent marking; hypothalamus-preoptic area; sexual behavior; sexually dimorphic area; Meriones unguiculatus; testosterone, 185

Auto-titration
D-amphetamine; brain self-stimulation; reinforcement threshold; detection threshold; response rate; locomotor activity, 93

B

Basal forebrain
AF64A; maze learning; choline acetyltransferase; acetylcholinesterase, 119

Behavior
diabetes mellitus; catecholamine; spontaneously diabetic Wistar BB rat, 51

Behavioral difference
delayed alternation; stimulus presentation; gonadectomy; male Wistar rat; female Wistar rat, 103

Bilateral presentation
tachistoscope; simultaneous presentation; successive presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric activiation; interhemispheric integration, 193

Bombesin
intracerebroventricular injection; grooming; scratching; time course; response topography; scopolamine; golden hamster, 173

Brain reward mechanism
intracranial self-stimulation; learning; memory; shuttle-box avoidance, 111

Brain self-stimulation
D-amphetamine; auto-titration; reinforcement threshold; detection threshold; response rate; locomotor activity, 93

C

Cat
caudate nucleus; superior colliculus; motor behaviour; muscimol; apomorphine; haloperidol; switching, 17

Catecholamine
diabetes mellitus; behavior; spontaneously diabetic Wistar BB rat, 51

obesity; monoamine oxidase; serotonin; obese mouse; pargyline; clorgyline, 147

Caudate nucleus
superior colliculus; motor behaviour; muscimol; apomorphine; haloperidol; switching; cat, 17

Central amygdala
lateral amygdala; discrimination learning; lesion; rat, 61

Cerebral asymmetry
hemisphere; interhemispheric process; response latency, 211

visual processing; cortical organization; face orientation; configurational encoding; reaction time; macaque monkey, 245

Child
visual field; forced choice procedure, 7

Choline acetyltransferase
AF64A; maze learning; basal forebrain; acetylcholinesterase, 119

Circling
parietal cortex; frontal cortex; corpus callosum; neglect; lateralization, 135

Clorgyline
obesity; monoamine oxidase; catecholamine; serotonin; obese mouse; pargyline, 147

Configurational encoding
visual processing; cortical organization; face orientation; cerebral asymmetry; reaction time; macaque monkey, 245

Corpus callosum
parietal cortex; frontal cortex; neglect; circling; lateralization, 135

anterior commissure; vision; memory; macaque, 267

Cortex
event-related potential; ultrasonic signal; estrous cycle; inferior colliculus; rat, 43

Cortical connection
vision; primate, 225

development; vision; primate, 237

Cortical organization
visual processing; face orientation; cerebral asymmetry; configurational encoding; reaction time; macaque monkey, 245

Cycloplegic
visual discrimination learning; flicker sensitivity; pretectum; posterior thalamus; lesion; mydriasis; rat, 27

Cysteamine
somatostatin; dopamine agonist; stereotypy; locomotor activity; striatum, 179

D

D-amphetamine
brain self-stimulation; auto-titration; reinforcement threshold; detection threshold; response rate; locomotor activity, 93

morphine; diazepam; 5,7-dihydroxytryptamine; place conditioning; serotonin; reward; rat, 127

Defense
aggression; offense; serotonin; ethological analysis; neurotoxin; rat, 85

Delayed alternation
stimulus presentation; behavioral difference; gonadectomy; male Wistar rat; female Wistar rat, 103

Desglycinamide vasopressin
visual attention; signal detection; vasopressin; amphetamine; rat, 35

Detection threshold
D-amphetamine; brain self-stimulation; auto-titration; reinforcement threshold; response rate; locomotor activity, 93

Development
cortical connection; vision; primate, 237

Development of lateralization
visual lateralization; domestic chick, 201

Diabetes mellitus
behavior; catecholamine; spontaneously diabetic Wistar BB rat, 51

Diazepam
D-amphetamine; morphine; 5,7-dihydroxytryptamine; place conditioning; serotonin; reward; rat, 127

5,7-Dihydroxytryptamine
D-amphetamine; morphine; diazepam; place conditioning; serotonin; reward; rat, 127

Discrimination learning
central amygdala; lateral amygdala; lesion; rat, 61

Domestic chick
visual lateralization; development of lateralization, 201

Dopamine
substance P; passive avoidance learning; 5-hydroxytryptamine; substantia nigra; mouse, 159

Dopamine agonist
somatostatin; cysteamine; stereotypy; locomotor activity; striatum, 179

Dopaminergic graft
nucleus accumbens; 6-hydroxydopamine; lesion; A10 dopaminergic neuron; rat, 73

E

Estrous cycle
event-related potential; ultrasonic signal; cortex; inferior colliculus; rat, 43

Ethological analysis
aggression; offense; defense; serotonin; neurotoxin; rat, 85

Event-related potential
ultrasonic signal; estrous cycle; cortex; inferior colliculus; rat, 43

F

Face orientation
visual processing; cortical organization; cerebral asymmetry; configurational encoding; reaction time; macaque monkey, 245

Female Wistar rat
delayed alternation; stimulus presentation; behavioral difference; gonadectomy; male Wistar rat, 103

Flicker sensitivity
visual discrimination learning; pretectum; posterior thalamus; lesion; cycloplegic; mydriasis; rat, 27

Forced choice procedure
visual field; child, 7

Frontal cortex
parietal cortex; corpus callosum; neglect; circling; lateralization, 135

G

Golden hamster
bombesin; intracerebroventricular injection; grooming; scratching; time course; response topography; scopolamine, 173

Gonadectomy
delayed alternation; stimulus presentation; behavioral difference; male Wistar rat; female Wistar rat, 103

Grooming
bombesin; intracerebroventricular injection; scratching; time course; response topography; scopolamine; golden hamster, 173

H

Haloperidol
caudate nucleus; superior colliculus; motor behaviour; muscimol; apomorphine; switching; cat, 17

Hemisphere
cerebral asymmetry; interhemispheric process; response latency, 211

Human
pointing; proprioception; vision; interaction, 1

6-Hydroxydopamine
nucleus accumbens; dopaminergic graft; lesion; A10 dopaminergic neuron; rat, 73

5-Hydroxytryptamine
substance P; passive avoidance learning; dopamine; substantia nigra; mouse, 159

Hypothalamus-preoptic area
atropine; scent marking; sexual behavior; sexually dimorphic area; Meriones unguiculatus; testosterone, 185

I

Inferior colliculus
event-related potential; ultrasonic signal; estrous cycle; cortex; rat, 43

Interaction
pointing; proprioception; vision; human, 1

Interhemispheric activation
tachistoscope; bilateral presentation; simultaneous presentation; successive presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric integration, 193

Interhemispheric cooperation
tachistoscope; bilateral presentation; simultaneous presentation; successive presentation; intrahemispheric interference; interhemispheric activation; interhemispheric integration, 193

Interhemispheric integration
tachistoscope; bilateral presentation; simultaneous presentation; successive presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric activation, 193

Interhemispheric process
cerebral asymmetry; hemisphere; response latency, 211

Interhemispheric transfer
visual system; monocular discrimination; pigeon, 259

Intracerebroventricular injection
bombesin; grooming; scratching; time course; response topography; scopolamine; golden hamster, 173

Intracranial self-stimulation
brain reward mechanism; learning; memory; shuttle-box avoidance, 111

Intrahemispheric interference
tachistoscope; bilateral presentation; simultaneous presentation; successive presentation; interhemispheric cooperation; interhemispheric activation; interhemispheric integration, 193

L

Lateral amygdala
central amygdala; discrimination learning; lesion; rat, 61

Lateralization
parietal cortex; frontal cortex; corpus callosum; neglect; circling, 135

Learning
brain reward mechanism; intracranial self-stimulation; memory; shuttle-box avoidance, 111

Lesion
visual discrimination learning; flicker sensitivity; pretectum; posterior thalamus; cycloplegic; mydriasis; rat, 27

central amygdala; lateral amygdala; discrimination learning; rat, 61

nucleus accumbens; dopaminergic graft; 6-hydroxydopamine; A10 dopaminergic neuron; rat, 73

Locomotor activity
D-amphetamine; brain self-stimulation; auto-titration; re-

inforcement threshold; detection threshold; response rate, 93

somatostatin; cysteamine; dopamine agonist; stereotypy; striatum, 179

M

Macaque
corpus callosum; anterior commissure; vision; memory, 267

Macaque monkey
visual processing; cortical organization; face orientation; cerebral asymmetry; configurational encoding; reaction time, 245

Male Wistar rat
delayed alternation; stimulus presentation; behavioral difference; gonadectomy; female Wistar rat, 103

Maze learning
AF64A; basal forebrain; choline acetyltransferase; acetylcholinesterase, 119

Memory
brain reward mechanism; intracranial self-stimulation; learning shuttle-box avoidance, 111
corpus callosum; anterior commissure; vision; macaque, 267

Meriones unguiculatus
atropine; scent marking; hypothalamus-preoptic area; sexual behavior; sexually dimorphic area; testosterone, 185

Monoamine oxidase
obesity; catecholamine; serotonin; obese mouse; pargyline; clorgyline, 147

Monocular discrimination
interhemispheric transfer; visual system; pigeon, 259

Morphine
D-amphetamine; diazepam; 5,7-dihydroxytryptamine; place conditioning; serotonin; reward, rat, 127

Motor behaviour
caudate nucleus; superior colliculus; muscimol; apomorphine; haloperidol; switching; cat, 17

Mouse
substance P; passive avoidance learning; 5-hydroxytryptamine; dopamine; substantia nigra, 159

Muscimol
caudate nucleus; superior colliculus; motor behaviour; apomorphine; haloperidol; switching; cat, 17

Mydriasis
visual discrimination learning; flicker sensitivity; pretectum; posterior thalamus; lesion; cycloplegic; rat, 27

N

Neglect
parietal cortex; frontal cortex; corpus callosum; circling; lateralization, 135

Neurotoxin
aggression; offense; defense; serotonin; ethological analysis; rat, 85

Nucleus accumbens
dopaminergic graft; 6-hydroxydopamine; lesion; A10 dopaminergic neuron; rat, 73

O

Obese mouse
obesity; monoamine oxidase; catecholamine; serotonin; pargyline; clorgyline, 147

Obesity
monoamine oxidase; catecholamine; serotonin; obese mouse; pargyline; clorgyline, 147

Offense
aggression; defense; serotonin; ethological analysis; neurotoxin; rat, 85

P

Pargyline
obesity; monoamine oxidase; catecholamine; serotonin; obese mouse; clorgyline, 147

Parietal cortex
frontal cortex; corpus callosum; neglect; circling; lateralization, 135

Passive avoidance learning
substance P; 5-hydroxytryptamine; dopamine; substantia nigra; mouse, 159

Pigeon
interhemispheric transfer; visual system; monocular discrimination, 259

Place conditioning
D-amphetamine; morphine; diazepam; 5,7-dihydroxytryptamine; serotonin; reward; rat, 127

Pointing
proprioception; vision; interaction; human, 1

Posterior thalamus
visual discrimination learning; flicker sensitivity; pretectum; lesion; cycloplegic; mydriasis; rat, 27

Pretectum
visual discrimination learning; flicker sensitivity; posterior thalamus; lesion; cycloplegic; mydriasis; rat, 27

Primate
cortical connection; vision, 225

development; cortical connection; vision, 237

Proprioception
pointing; vision; interaction; human, 1

R

Rat
aggression; offense; defense; serotonin; ethological analysis; neurotoxin, 85

central amygdala; lateral amygdala; discrimination learning; lesion, 61

D-amphetamine; morphine; diazepam; 5,7-dihydroxytryptamine; place conditioning; serotonin; reward, 127

event-related potential; ultrasonic signal; estrous cycle; cortex; inferior colliculus, 43

nucleus accumbens; dopaminergic graft; 6-hydroxydopamine; lesion; A10 dopaminergic neuron, 73

visual discrimination learning; flicker sensitivity; pretectum; posterior thalamus; lesion; cycloplegic; mydriasis, 27

visual attention; signal detection; vasopressin; desglycinamide vasopressin; amphetamine, 35

Reaction time
visual processing; cortical organization; face orientation; cerebral asymmetry; configurational encoding; macaque monkey, 245

Reinforcement threshold
D-amphetamine; brain self-stimulation; auto-titration; detection threshold; response rate; locomotor activity, 93

Response latency
cerebral asymmetry; hemisphere; interhemispheric process, 211

Response rate
D-amphetamine; brain self-stimulation; auto-titration; reinforcement threshold; detection threshold; locomotor activity, 93

Response topography
bombesin; intracerebroventricular injection; grooming; scratching; time course; scopolamine; golden hamster, 173

Reward
D-amphetamine; morphine; diazepam; 5,7-dihydroxytryptamine; place conditioning; serotonin; rat, 127

S

Scent marking
atropine; hypothalamus-preoptic area; sexual behavior; sexually dimorphic area; Meriones unguiculatus; testosterone, 185

Scopolamine
bombesin; intracerebroventricular injection; grooming; scratching; time course; response topography; golden hamster, 173

Scratching
bombesin; intracerebroventricular injection; grooming; time course; response topography; scopolamine; golden hamster, 173

Serotonin
aggression; offense; defense; ethological analysis; neurotoxin; rat, 85

D-amphetamine; morphine; diazepam; 5,7-dihydroxytryptamine; place conditioning; reward; rat, 127

obesity; monoamine oxidase; catecholamine; obese mouse; pargyline; clorgyline, 147

Sexual behavior
atropine; scent marking; hypothalamus-preoptic area; sexually dimorphic area; Meriones unguiculatus; testosterone, 185

Sexually dimorphic area
atropine; scent marking; hypothalamus-preoptic area; sexual behavior; Meriones unguiculatus; testosterone, 185

Shuttle-box avoidance
brain reward mechanism; intracranial self-stimulation; learning; memory, 111

Signal detection
visual attention; vasopressin; desglycinamide vasopressin; amphetamine; rat, 35

Simultaneous presentation
tachistoscope; bilateral presentation; successive presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric activation; interhemispheric integration, 193

Somatostatin
cysteamine; dopamine agonist; stereotypy; locomotor activity; striatum, 179

Spontaneously diabetic Wistar BB rat
diabetes mellitus; behavior; catecholamine, 51

Stereotypy
somatostatin; cysteamine; dopamine agonist; locomotor activity; striatum, 179

Stimulus presentation
delayed alternation; behavioral difference; gonadectomy;

male Wistar rat; female Wistar rat, 103

Striatum
somatostatin; cysteamine; dopamine agonist; stereotypy; locomotor activity, 179

Substance P
passive avoidance learning; 5-hydroxytryptamine; dopamine; substantia nigra; mouse, 159

Substantia nigra
substance P; passive avoidance learning; 5-hydroxytryptamine; dopamine; mouse, 159

Successive presentation
tachistoscope; bilateral presentation; simultaneous presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric activation; interhemispheric integration, 193

Superior colliculus
caudate nucleus; motor behaviour; muscimol; apomorphine; haloperidol; switching; cat, 17

Switching
caudate nucleus; superior colliculus; motor behaviour; muscimol; apomorphine; haloperidol; cat, 17

T

Tachistoscope
bilateral presentation; simultaneous presentation; successive presentation; intrahemispheric interference; interhemispheric cooperation; interhemispheric activation; interhemispheric integration, 193

Testosterone
atropine; scent marking; hypothalamus-preoptic area; sexual behavior; sexually dimorphic area; Meriones unguiculatus, 185

Time course
bombesin; intracerebroventricular injection; grooming; scratching; response topography; scopolamine; golden hamster, 173

U

Ultrasonic signal
event-related potential; estrous cycle; cortex; inferior colliculus; rat, 43

V

Vasopressin
visual attention; signal detection; desglycinamide vasopressin; amphetamine; rat, 35

Vision
corpus callosum; anterior commissure; memory; macaque, 267

cortical connection; primate, 225

development; cortical connection; primate, 237

pointing; proprioception; interaction; human, 1

Visual attention
signal detection; vasopressin; desglycinamide vasopressin; amphetamine; rat, 35

Visual discrimination learning
flicker sensitivity; pretectum; posterior thalamus; lesion; cycloplegic; mydriasis; rat, 27

Visual field
forced choice procedure; child, 7

Visual lateralization
development of lateralization; domestic chick, 201

Visual processing
cortical organization; face orientation; cerebral asymmetry; configurational encoding; reaction time; macaque monkey, 245

Visual system
interhemispheric transfer; monocular discrimination; pigeon, 259
